

Summer 2018 Math Challenge for Incoming 3rd Graders!!!

Dear Parents,

At PCS we love for all of our students to continue learning through the summer. This year for MATH, we are giving students some options for continuing their math practice. Choose from the options below – do what matches your summer plans best!

Options:

1. Attached is a **calendar** filled with fun, interactive math activities that can be done over the summer to review some of the math learned during the school year. Many of the activities are designed to include a quick conversation with a friend or adult. When you do an activity, initial the box and have your child write any responses in the box (or separate paper if needed). When your child returns to school, have them bring the calendar to their new teacher or Mrs. Semancik.
2. Use **Sumdog** 3 times a week. Go to www.sumdog.com.
3. This year the state of Connecticut has a **FREE summer math challenge**. Go to www.quantiles.com/summer-math to enroll your child. Starting Monday, June 18, check your inbox for daily emails with fun math activities and resources. Visit quantiles.com/summer-math every day to read about the weekly math concept and earn badges. When the program ends on Friday, July 27, print an award certificate to celebrate your child's summer accomplishment! Bring the certificate to school in August.

HAVE FUN!!
